

PREFACE

The Technical Highlights for 2006 is the product of the efforts of all the members of the Laboratory for Atmospheres. Their dedication to advancing Earth Science through conducting research, developing and running models, designing instruments, managing projects, running field campaigns, and numerous other activities has produced many significant results. These can only be briefly highlighted in this report.

Production of this report has been guided by William K.–M. Lau, Chief of the Laboratory for Atmospheres who, along with Charles Cote, our Associate Chief, checked the report for accuracy, made suggestions regarding its content, and contributed to several sections. Walt Hoegy, editor for several years and now an emeritus member of the Laboratory, continued his association with this report by participating in teleconferences, and making valuable suggestions concerning the organization of this report and its content. Andy Negri contributed to sections of this report, gathered material for other sections and helped with its organization. Laura Rumburg gathered material for the Major Activities section, carefully proofread the report, and corrected many errors present in the initial drafts. Members of the administrative staff of the Laboratory and its branches: Caroline Maswanganye, Pat Luber, and Cathy Newman were instrumental in gathering material for the report and soliciting the contributions of Lab members. Elaine Firestone performed the final formatting, turning this report into a polished product in a timely manner.

Goran Halusa, our Laboratory Web Master, created the final cover design and published this report on our Web site, <http://atmospheres.gsfc.nasa.gov>.
